Website Development Project Minutes

Telecon was held on: Apr 19, 2012, 8:00 PDT, 17:00 CEST
Participants: Sean Kelly, Sean Hardman, Pedro Osuna, Emily Law

Meeting Summary:

Sean Kelly has prototyped a new website structure with theme discussed before. The prototype is available at: http://planetarydata.ath.cx:443/ipda

The consensus is to keep the new website structure simple. Though the automation in promoting standards is nice, it is overkilled and too much effort for IPDA since it's only a small community. Focus should be on making the site easy for users to add and remove documentation, easy to navigate, and simplify level of control. All pages should be open for changes by users except Steering Committee and Standards Page.

Action items:
1. Kelly to remove backend automation, make all pages editable by all except SC and Standards page, mimic existing standards table for Standards page, use similar table structure for Documents, migrate content to new structure, add Documents page back plus Meetings page. Have these ready in 2 weeks and earlier if possible.

2. Emily to circulate Document category suggestion.

3. Next telecon to be held on May 3rd 2012 @ 8:00 PDT, 17:00. Emily to send notice of meeting.
