

International Planetary Data Alliance

Registry Deployment Project

TEG Meeting
September 19, 2012
Sean Hardman

Goals

- Build on the progress made by the Registry Development and Coordination project and expand the content and usage of the IPDA Registry Service.
- Registration of data, dictionary, tools and services from IPDA members into the common IPDA registry service instance.
- Work closely with the Tool Registration project to expand the content and usage of the current IPDA Tool Registry.

Plan

- Work with other agencies to gain access to their data set metadata in order to populate the IPDA registry.
- Expand the support beyond data sets to encompass investigation, instrument, etc. information.
- Develop a procedure/process for keeping this extracted metadata up-to-date.
- Expand the IPDA web site interface to support management of and search beyond tools and services.

Near Term

- Invite IPDA members to join the effort.
- Document project plan, including tasks and milestones.
- Upgrade the current Registry Service installation with the upcoming release (PDS Build 3a).
- Start addressing defined tasks.
